

I claim.

1. An apparatus for erasing and cleaning marking boards comprising:  
a bracket having a top surface, a bottom surface, a front and a back end, said  
bracket also having an opening in the front end of the bracket;  
5 an eraser attached to the bottom; and  
a container having cleaning solution therein, said container being inserted into  
said bracket through the opening in the front end of the bracket.
2. The apparatus as described in claim 1 wherein said bracket further comprises  
10 sides connected to the top surface, bottom surface and front and back ends of the bracket.
3. The apparatus as described in claim 2 further comprising a set of extensions  
attached to said bracket sides.
- 15 4. The apparatus as described in claim 3 further comprising a first front extension  
attached to the bottom surface of the bracket at the front end of the bracket, the extension  
having a curved shape and used to hang and store the apparatus when the apparatus is not  
in use.
- 20 5. The apparatus as described in claim 4 further comprising an extension at the rear  
end of the bracket and a second front extension, said second front extension being  
positioned between the first front extension and said rear end extension.
6. The apparatus as described in claim 1 further comprising an adhesive material  
25 affixed to the bottom side of said bracket, said adhesive material used for attaching the  
eraser to the bottom of the bracket.
7. The apparatus as described in claim 1 wherein said bracket comprises a top  
section and a bottom section, said top and bottom section being detachable from each  
30 other.

8. The apparatus as described in claim 7 wherein said top and bottom sections each further comprise an internal side, each said internal side having a wall extending from said internal side, said walls containing an approximately half circle opening and being said walls being aligned such that when said top and bottom sections are attached a circle  
5 opening is formed from the half circle openings of said walls.

9. A system for erasing and cleaning marking boards comprising;  
a bracket having a top surface, a bottom surface, a front and a back end, said  
bracket also having an opening in the front end of the bracket;  
10 an eraser attached to the bottom;  
a container having cleaning solution therein, said container being inserted into  
said bracket through the opening in the front end of the bracket; and  
a hanger in the general location of the marker board for holding the bracket,  
eraser and container combination when the bracket combination is not in use.

15

10. The system as described in claim 9 wherein said hanger further comprises a hooked shaped top portion for engaging and holding the bracket combination.

11. The system as described in claim 10 wherein said hanger further comprises an  
20 adhesive material to affix the hanger adjacent a marker board.
